

Take the Pain Out of Conference and Meeting Room Wi-Fi Administration.

SolutionIP FLEX® Conference Creo is a revolutionary new software program that gives conference and event administrators the ability to quickly and easily plan, create, schedule and manage conferences and events by simply automating the technical aspects of planning, preparing, and enabling the Wi-Fi network services.

Conference Creo Highlights

Helping you easily plan your Wi-Fi management from start to finish.

Logically configure the Wi-Fi Network to meet your event size

Plan and create future and recurring conferences and events easily

Initiate conferences and make changes in real time using our simplified interface

Manage conferences and events from a centralized web-based dashboard

Audit active and past conferences from the centralized web-based dashboard

Create conference templates for current and future events in advance

Assign role based access and responsibilities to specific people and departments

FEATURES

The Conference Creo Dashboard provides an easy to use web-based application that allows management of active, upcoming and past conferences.

Alerts for network resources can be set to manage bandwidth and other network resources.

Context Sensitive Help provides an easy and simple help tool.

Easy System Administration for Global Conference Settings allows the administrator to add new conferences, set up User Accounts and view Conference Attributes.

Reporting displays a wealth of information on current and past conferences, including user statistics and network resources analysis.

Make Meetings Easy with SolutionIP FLEX® Conference Creo

Easy installation, licensing, and device setup makes conference and event Wi-Fi management a breeze. To find out how you can simplify your conference and event Wi-Fi management, please contact:
