## SolutionInc 20<sup>th</sup> Anniversary 20 Years of Innovation

Halifax, Nova Scotia – Today, the dedicated team at SolutionInc celebrates 20 years of providing internet gateway solutions and services to the global public internet access industry.

From SolutionInc's initial vision in 1997 of allowing business travellers to seamlessly connect to the internet from their hotel room, to today, where millions of users around the world connect to the internet using SolutionInc's on-premise and cloud-based technology services in hotels, convention centres, travel terminals, hospitals, shopping centres and cities in over 50 countries.

SolutionInc is proud to celebrate two decades of success and innovation. Over the past two decades the dedicated employees, business partners, and global customers have collaborated to create solutions that have helped shape an industry, where public access is now seamless and secure.

Since the internet's inception, SolutionInc has always been recognized as a global thought-leader in public internet access. With the continued demand for public access and rapid adoption of IOT, Analytics, Wearables, AI systems, and Smart Homes, SolutionInc will continue to provide market-defining technology, products, and services, one innovation at a time.

It's the high profile customers that serve as a testimonial to the dedication SolutionInc has to customer service and user experience. SolutionInc would like to give special thanks to all their business partners and customers for the years of support that has helped SolutionInc become the global business it is today.

"This milestone is a testament to SolutionInc's commitment to continued innovation, and to the future of the company, our partners and the industry."

Randy Currie - Chief Technology Officer - SolutionInc Limited
