

SOLUTIONINC RAPID DEPLOYMENT WI-FI

Are you an event organizer looking to offer public Wi-Fi during your festival or event? We provide solutions for temporary Wi-Fi network infrastructure deployments for events and festivals. Our Rapid Deployment service can provide exceptional Wi-Fi service to your visitors. We deploy and manage the public Wi-Fi network to function optimally during your event.

Our specialty is providing secure, fully managed public and private Wi-Fi technology solutions – whether it's a permanent venue like in a conference center, hotel, park or apartment building – or whether you're putting on a 2-3 day festival, single-day culinary event downtown, or a week-long sporting event, indoors or outdoors, we can help. Organizing the logistics to make your event a success require the experience and technology solutions of SolutionInc.

The number of smart-phone users continues to grow, and thus the use of mobile Internet. The result is that more and more frequently in high density venues the mobile network is overloaded. To avoid this so-called 'mobile meltdown', SolutionInc delivers solutions that make it possible for limitless users to simultaneously use Wi-Fi, delivering high quality fairness of service, utilizing the most powerful, scalable, and advanced wireless network solutions currently available.

STAY SOCIAL

Most visitors to your event today cannot live without Instagram, Facebook or Twitter. With public Wi-Fi available, they'll share their experience through social media. This gives a boost to the reputation of the event. Wi-Fi users capture their experience and share it with the rest of the world.

STAY CURRENT
AND PUT A SPOTLIGHT
ON YOUR EVENT

In a world that demands to be connected, our mission is to ensure a seamless, customized WiFi experience at every event we are part of.

By using Wi-Fi authentication, welcome pages and post landing pages, you create an ideal opportunity for sponsorship advertising. Afterwards, you will receive detailed reports with user information that is essential for adding value to sponsor your event.

STAY SPONSORED

STAY CONNECTED

The development of event technology has risen with digital festival program booklets. The usability and frequency of use can rely in the availability of Wi-Fi. Visitors are directly linked to the organization and this offers a unique opportunity to stay connected to visitors, gather real-time data and make adjustments to the program where necessary.
